

How to Activate Your Global Internet Plan (eSIM)

⚠ Important: Most eSIMs can only be installed **once**. If you remove the eSIM from your device after installation, you may not be able to install it again.

Before you begin, make sure you have a **stable internet connection** and **do not interrupt the installation process**.

For iOS 17.4 and Above

- **Step 1 – Install the eSIM**

Tap **Install eSIM**, then tap **Continue** twice.

Your eSIM will connect to the network. This may take a few minutes. Once completed, tap **Done**.

- **Step 2 – Choose a Label**

Select a label for your new eSIM (for example, *Travel* or *Global Internet Plan*).

- **Step 3 – Select Your Default Line**

Choose **Primary** as your default line, then tap **Continue**.

- **Step 4 – iMessage & FaceTime**

Choose the **Primary** line you want to use with **iMessage** and **FaceTime** for your Apple ID, then tap **Continue**.

- **Step 5 – Mobile Data**

Select your new eSIM as your preferred **Mobile Data** line, then tap **Continue**.

For iOS 17.3 and Below

- **Step 1 – Open the QR Code**

Tap the QR code to begin the installation process.

- **Step 2 – Share the QR Code**

On the next screen, **press and hold** the QR code until your iPhone's sharing options appear.

- **Step 3 – Add the eSIM**

From the pop-up menu, select **Add eSIM**.

- **Step 4 – Confirm Installation**

When prompted, tap **Allow** to authorise the activation of your new eSIM.

How to Activate Your Global Internet Plan (eSIM)

⚠ Important: Most eSIMs can only be installed **once**. If you remove the eSIM from your device after installation, you may not be able to install it again.
Before you begin, make sure you have a **compatible mobile phone, stable internet connection** and **do not interrupt the installation process**.

Direct on the device	QR Code	Manual
Step 1 – Install the eSIM • Tap on Activate your eSIM twice, then tap Set up. Your device will open the eSIM activation screen. • Follow the on-screen instructions and tap Continue or Add when prompted • Wait until the installation is completed • Do not close the app during installation Step 2 – Enable data • Go to Settings → Network Internet → SIMs → Mobile Network (menu names may vary depending on device manufacturer) • Select the newly added eSIM profile • Enable Mobile data, then Data Roaming • If the network does not connect immediately, restart your mobile	Activate your eSIM Scan the QR code by printing out displaying it on another device. Make sure your phone has stable connection before installing it. Share QR Code: 1. Go to Settings → “Network & Internet” → “(+)” next to the SIM’s section. If not available, then tap “SIMs/Mobile Network” on your device 2. Tap “Download an eSIM instead?”, then “Next” 3. Tap “Use a different network” if you need to confirm your network 4. Scan the QR code, then tap “Download/Activate” 5. Tap “settings/Done” when you see “download finished” screen	Activate your eSIM Copy the “SM-DP+Address & Activation Code” and enter the details manually as follows: 1. Go to Settings → “Network & Internet” → “(+)” next to the SIM’s section. If not available, then tap “SIMs/Mobile Network” on your device 2. Tap “Download an eSIM instead?”, then “Next” 3. Tap “Need help? Then “enter it manually” 4. Enter/Paste the “SM-DP+Address & Activation Code”, tap “Continue”, then tap “Download/ Activate” 5. Tap “settings/Done” when you see “download finished” screen
